

MÁXIMA BUTTERFLY NEWSLETTER

BUTTERFLIES SOAR INTO 2024

April 2024

A VIBRANT START

The Butterflies kick-started 2024 with a personal development course focusing on embracing positive change, overcoming hurdles, and prioritizing well-being on the journey to self-improvement.

The Máxima communication workshop prepared them with skills in mastering the art of communication and conducting interviews for our "in the spotlight" article. The Bioinformatics, R2 Platform course at Amsterdam Medical Center University, introduced advanced analysis genomics pipelines. Check out the Máxima Butterfly website for further insights.

SECONDMENTS

It's early days but 2 Butterflies have already embarked on their secondments! We wish Marnik Paeps and Doga Yurddas the very best of luck. Marnik has travelled to Nemours Children's Health in Delaware USA, and Doga is attending The University of Oldenburg, Germany. We are grateful to all of our associated partners for your willingness to host the Butterfly students on their secondments.

INDUSTRIAL MARKET FAIR SEPT 2024

As part of the Autumn School we're excited to announce our Industrial Market Fair. Stay tuned for updates!

DYNAMIC DUO:

DC MANAGEMENT COMMITTEE REPS 2024

Congrats to Aleksandra Letunovska and Doga Yurddas who will be the DC management committee representatives for 2024. They will represent the students at the management committee and group leader meeting in June. Crownbioscience will be the associated partner representative.

SPOTLIGHT SELECTIONS

The students have started the exciting tradition of choosing a Butterfly group leader each quarter for "in the spotlight," interviews. This quarter's supervisor is Ruben van Boxtel. Ruben's journey is nothing short of inspiring. Interested! Please click [here](#).

MID-TERM REVIEW SEPT/OCT 2024

Our mid-term review will be held in Sept./Oct. 2024.

Humazing Science

The Butterfly students embark on their personal development journeys.

"Don't set limitations on what you can achieve"
